

Special Issue of Water Policy on "Water and Disasters"

Special Issue of Water Policy "Water and Disaster" Cases from HELP

The Special Issue of Water Policy on "Water and Disasters" is a compilation of case studies of water related disasters and policy lessons learned from those cases developed by the High-level Experts and Leaders Panel on Water and Disasters (HELP).

It will be published through IWA Publishing, and will be launched in April 2015 at the 7th World Water Forum in Daegu & Gyeongbuk, Korea.

The special issue brings visibility to lessons learned from recent water-related disasters, and highlight how the analytical, technical and political spheres interact in anticipating, responding, adapting to and preventing/mitigating effects of water related disasters. It provides the world with key policy messages for addressing water-related disasters and contribute to laying a foundation for weathering future disasters to come, and make progress towards creating a better-prepared and resilient society.

Lt. Gen. Thomas P. Bostick
Chief of Engineers, US Army Corps of Engineers
Member of HELP

Coming Soon!

It will become available at HELP's website at <http://www.wateranddisaster.org/>

During 2014 members of the High-level Experts and Leaders Panel on Water and Disasters (HELP) solicited case studies on water and disasters. After review, these contributions comprise the special issue of Water Policy.

It consists of 10 cases studies and concludes with HELP's position paper on climate change and water-related disaster risk reduction: "Water-Related Disaster Risk Reduction: Time for Preventive Action: Position Paper of the High-level Experts and Leaders Panel on Water and Disasters".

Special Issue of Water Policy Journal:

Cases from the High-level Experts and Leaders Panel on Water and Disasters

Table of Contents

1. A Global perspective on Flood Disasters

Wolfgang Kron, Munich Re

2. Lessons learned from Mega-Disasters and Future Policy Development on Water-related Disaster Management in Japan

Kenichiro Tachi, Japan

3. The Delta plan revisited: Changing perspectives in the Netherlands' flood risk reduction philosophy

Minister Melanie Schultz van Haegen, and Koos Wieriks, the Netherlands

4. Water Related Disaster Risk Reduction (DRR) Management in the United States: Floods and Storm Surges

Jerome Delli Priscoli and Eugene Stakhiv, USA

5. Tale of Three Cities: Kuala Lumpur, Bangkok, Metro Manila

Abdullah Keizrul, et al., NARBO

6. Elbe Floods Translating Policies into Actions - The Case of the Elbe River

Wolfgang Grabs , Germany; and Hans Moser, the Netherlands

7. Lessons Learned from the Big Floods, 1993-2013 - the Bavarian Flood action program 2020

Martine Brambow, et. al., Germany

8. Losing memory - the risk of a major flood in Paris region - Improving prevention policies

Charles Baubion, OECD

9. Integrated policies and practices for flood and drought risk management

A. Grobicki, F. MacLeod, F. Pischke, Global Water Partnership

10. Integrated Actions in the Management of Critical Hydrologic Events: Flood Vulnerability Atlas and Situation Rooms, Brazil

Bruna Mendonca, et. al, Brazil

11. Water-related Disaster Risk Reduction: time for preventive action - Position Paper of the High-level Experts and Leaders Panel on Water and Disasters

High-level Experts and Leaders Panel on Water and Disasters (HELP)
